Cal Dive Reports Fourth Quarter Earnings of 20 Cents

HOUSTON, Feb. 17 /PRNewswire/ -- Cal Dive International, Inc. (Nasdaq: CDIS) reported fourth quarter net income of \$3.2 million, \$0.20 per diluted share. This compares to net income of \$5.4 million, or \$0.36 per share earned in the same period of 1998. While the seasonal slowdown of the quarter and soft market conditions depressed activity levels, CDI revenues of \$42.4 million actually increased 14% over the previous fourth quarter. This improvement was due to work on the first ever Deepwater-decommissioning project in the Gulf of Mexico and strong results from Energy Resource Technology (ERT), the company's gas production business.

Annual revenues of \$161 million set a new all time Cal Dive record in the midst of one of the most difficult construction markets ever experienced in the Gulf. Net income of \$16.9 million was 30% lower than the \$24.1 million reported in 1998. Diluted earnings per share of \$1.10 declined slightly more than that (32%) in light of the additional shares issued to acquire Aquatica, Inc.

Chairman and Chief Executive Officer Owen Kratz said, "Our people performed at exceptional levels, achieving virtually all of the corporate objectives we set for 1999. They accomplished this even though the industry cratered to a greater extent than we considered possible going into the year. EBITDA of \$44.8 million was almost identical to the cash flow of 1998 notwithstanding the 30% decline in net income due to increased revenues and ERT kicking back into high gear. As a result we emerge from 1999 with a strong balance sheet which will enable us to consider creative ways of redefining contractor-customer relationships in the emerging Deepwater Gulf market."

Cal Dive International, Inc. operates a fleet of technically advanced marine construction vessels and conducts salvage operations in the Gulf of Mexico. Energy Resource Technology, Inc., a wholly owned subsidiary, acquires and operates mature offshore properties as part of CDI decommissioning services.

This report and press release include certain statements that may be deemed "forward-looking statements" under applicable law. Forward-looking statements are not statements of historical fact and such statements are not guarantees of future performance or events and involve risks and assumptions that could cause actual results to vary materially from those predicted, including among other things, unexpected delays and operational issues associated with turnkey projects, the price of crude oil and natural gas, weather conditions in offshore markets, change in site conditions, and capital expenditures by customers. The Company strongly encourages readers to note that some or all of the assumptions upon which such forward looking statements are based are beyond the Company's ability to control or estimate precisely and may in some cases be subject to rapid and material change.
